EXPERIENCE

WEB DEVELOPMENT INTERN

COGNORISE INFO TECH

February 2024 - March 2024

- During my Internship Period, I gained hands-on experience in web development technologies including HTML, CSS, JavaScript, and Node.js.
- Enhanced web pages for user engagement by optimizing load times and implementing responsive design across all devices, resulting in a 25% increase in mobile traffic.

PROJECTS

COLLEGE BUS ATTENDANCE SYSTEM WEB APP

- A MERN stack web app, Sleek design to replace traditional paper based attendance with a modern digital solution for students who use College Bus Service.
- This solution enhances college bus management efficiency by 20%.
- The web app enables management to easily handle bus according to requirements, set up student fee structures and reduced manual attendance errors by 80% and optimize the time.

WEATHER WEB APP

https://github.com/M-Gokulkrishna/Weather_App_ReactJS

- Architected and developed a cutting-edge weather app using React JS, integrating Open Weather Map API for live weather updates. Improved user engagement by 20% and reduced app loading time by 30%.
- JavaScript “fetch” Method helps to fetch the Weather Data as per city name given in the input.
- This Web App has feature, We able to pin our favourite city in Drafts.

PORTFOLIO WEBSITE

[Website Link](#)

- Designed and Developed visually appealing Portfolio website using React Js and Node Js.
- Improved user interface and user experience upto 25% by adding Animations and transitions.
- Based on the current website trend the animations is implemented on Scroll (AOS) which enables smooth navigations and good looking.

EDUCATION
