## EXPERIENCE

---

### WEB DEVELOPMENT INTERN

#### COGNORISE INFO TECH

February 2024 - March 2024

- During my Internship Period, I gained hands-on experience in web development technologies including HTML, CSS, JavaScript, and Node.js.
- Enhanced web pages for user engagement by optimizing load times and implementing responsive design across all devices, resulting in a 25% increase in mobile traffic.

## PROJECTS

---

### COLLEGE BUS ATTENDANCE SYSTEM WEB APP

- A MERN stack web app, a sleek design to replace traditional paper-based attendance with a modern digital solution for students who use the College Bus Service.
- This solution enhances college bus management efficiency by 20%.
- The web app enables management to easily handle buses according to requirements, set up student fee structures and reduce manual attendance errors by 80% and optimize time.

### WEATHER WEB APP

[https://github.com/M-Gokulkrishna/Weather\\_App\\_ReactJS](https://github.com/M-Gokulkrishna/Weather_App_ReactJS)

- Architected a cutting-edge weather app using React JS, integrating OpenWeatherMap API for live weather updates. Improved user engagement by 20% and reduced app load time by 30%.
- JavaScript “fetch” Method helps to fetch the weather data as per city name given in the input.
- This Web App has a feature, We are able to pin our favorite city in Drafts, which is useful to reduce time consumption by 15% from often searching the same city.

### PORTFOLIO WEBSITE

[Website Link](#)

- Designed and developed visually appealing Portfolio website using React Js and Node Js.
- Improved user interface and user experience up to 25% by adding animations and transitions.
- Based on the current website trend the animations are implemented on Scroll (AOS) which enables smooth navigations by 20% and good looking.

## EDUCATION

---

- **Full Stack Development course** **2023 - Present**  
Institute: NXTWAVE - Online
- **Bachelor of Engineering in Mechatronics** **2020 - 2024**  
Mahendra Engineering College, Namakkal, TamilNadu.  
CGPA : 9.04 / 10 ( upto 8th Semester )

## SKILLS & COMPETENCE

---

- **Programming** : Python, JavaScript, Java.
- **Front End** : HTML, CSS, React JS, Bootstrap, Redux Toolkit
- **Back End** : MySQL, Node JS, Express JS, Mongo DB.

## ACHIEVEMENTS

---

- Secured 1st Place in the Project Expo at Sona Engineering College, Salem. **February 2023**  
( IoT Wireless Communications System ).
- 2nd prize for Paper Presentation at Government Engineering College, Salem. **April 2022**
